

Comments on D-Star Reflector 38

The Ohio D-Star Reflector 38 is the tool for state wide ARES, Severe Weather and other public service nets that serve our state. It does work with W8CMH; however, the plan is to keep Node C on W8CMH (2 meters) open for local nets and communications.

The SCIOTO VALLEY AMATEUR RADIO CLUB W8BAP Node B (70 cm) D-Star system in Stoutsville will be linked with Reflector 38 daily and the CENTRAL OHIO AMATEUR RADIO ASSOCIATION W8CMH Node B will be linked to Reflector 1C for those DX and wide area stateside contacts.

Both the W8BAP and W8CMH Node B systems seem to have about equal coverage in Central Ohio and are open systems.

The software on both Gateways is up to date.

Do let me know if you have questions.
